

ADVANCED INFORMATION AE105

ACOUSTIC ENERGY
for the love of music

The AE105 is the latest addition to the all-new 100 Series. A versatile, 2-way loudspeaker primarily designed for wall mounting, the AE105 is equally suited to a bookcase or shelf position.

The AE105 utilises a soft dome tweeter with WDT wave guide along with two 130mm paper cone drivers, one acting as a passive radiator for improved bass performance. Optimised for vertical wall mounting with the listening position at or below the tweeter axis, the AE105 can be used to simply enhance the stereo sound from your TV, or as Front L/R, Centre and Surround channel speakers within multi-channel home cinema systems... whilst partnered with the matching AE108² compact sub-woofer.

Finished in a choice of black, white or walnut vinyl veneers, they are supplied with rear mounting plates, template, wall spacers, black and light grey grilles for easy integration within any room décor.
